

Commerce-Related Menus Moved to a New Commerce Tab

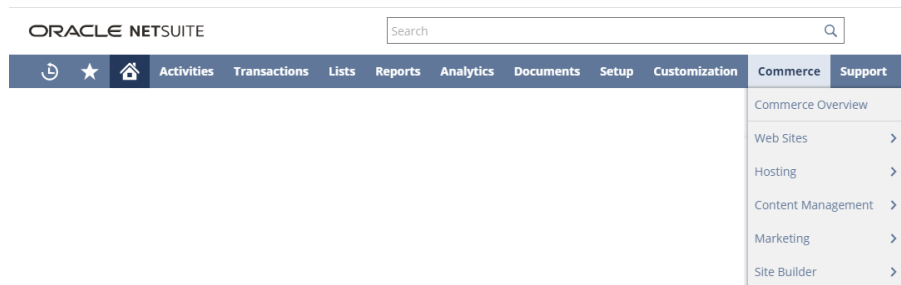

2021-04-05 - Fahtia Nurmalinda - Kommentare (0) - ARTICLES

What are Commerce Menus?

Commerce menu bundle helps users setting up and maintaining any task that is created using Commerce products.

What is Changing?

As of NetSuite 2021.1, access to features related to your Commerce sites has been consolidated under a new top-level Commerce tab.

This has changed the way to access the menu from what has been existing in the NetSuite 2020.2 release and earlier. Commerce-related features were accessible through multiple locations on the Setup or Lists tabs, as it is being found less practical. The multiple menus primarily include:

- **Setup > SuiteCommerce Advanced**
- **Setup > Site Builder**
- **Lists > Web Site**

Most Commerce features can no longer be accessed from the previous menu locations. However, the old menu locations contain a link to the new tab. Some

features related to extensions remain in the old locations but will soon be moved to the Commerce tab.

The Commerce tab will be implemented as part of the NetSuite 2021.1 release. You do not need to take any action to receive this feature.

The Commerce tab contains menu options relevant to the products you have enabled, that is, SuiteCommerce, SuiteCommerce Advanced, or Site Builder. Menus are organized to make finding features more intuitive.
