About Non Profit Suite Management

NFP Financials is the core bundle for Social Impact SuiteSuccess editions. It provides data structures for nonprofit accounting, constituent management, and grants.

The Enhanced Features You Can Try Right Away

- LYBUNT (Last Year But Not This Year)

This fancy report lists down constituents who donated in the last fiscal year but did not donate again in this fiscal year.

- SYBUNT (Some Year But Not This Year)

Online LYBUNT, this report lists constituents who donated at the range of days before the first day of the last fiscal year but did not donate again in the last or current fiscal year.

NFP Constituent Management Enhancement

As for the released version 1.01.5 of NFP Constituent Management SuiteApp includes a soft credits feature. This feature helps nonprofit organizations recognize constituents who helped bringing in a donation. With a donation, only the donor who makes the payment is credited for the donation. With soft credits, multiple constituents can be given credit for a donation.

Nonprofit organizations can view the soft credit amounts in the giving history and giving pattern of a constituent.

NFP SuiteApps Update Verification

NFP SuiteApps version 1.0.0 is now supported by Update Verification SuiteApp feature which helps you verify and update customizations after an NFP SuiteApp update. This SuiteApp provides a list of verifications that you must comply with to update to the latest version of an NFP SuiteApp.

When an update is blocked, the SuiteApp sends an email notification to the account administrator.

NetSuite commits to always come up with better improvements. The NFP Financials SuiteApp is built to be a managed SuiteApp that gives you an automatic update whenever enhancements and/or new features added.
