New Standard Setting to Activate or Deactivate Warning Message for Taxable Expense Lines Without Receipt

2021-04-21 - Fahtia Nurmalinda - Comments (0) - ARTICLES

As for documentation purpose, during the process of issuing a Taxable Expense Lines would require at least a receipt to be attached. Considering how essential it is, hence at the release version of 2019.2, Netsuite added a checkbox option to enable/disable the warning message alert for attaching document receipt at the submission of Taxable Expense Line.

What's on the new feature

- Displays warning message regarding file attachment if the expense report line is passable.
- Does not need additional script for missing attachments.
- This setting toggles the warning for both UI and SuiteTalk Expense Reports.

The screenshot shows the 'Expenses' settings page in Netsuite. It includes several checkboxes: 'EXPENSES BILLABLE BY DEFAULT' (unchecked), 'ITEMS BILLABLE BY DEFAULT' (checked), 'COMBINE DETAIL ITEMS ON EXPENSE REPORTS' (checked), 'COPY EXPENSE MEMOS TO INVOICES' (checked), 'SHOW WARNING MESSAGE FOR TAXABLE EXPENSE LINES WITHOUT RECEIPT' (checked and highlighted with a red rectangle), and 'ALLOW NON-REIMBURSABLE EXPENSES' (checked). Below these is a section for 'FOREIGN AMOUNT CHANGE' with a dropdown menu set to 'Recalculate Base Amount'.

How it Works

- Users receive a warning when creating Expense Reports with taxable lines without receipts.

This is a warning that does not prevent the creation of the record. This may be toggled on or off by navigating to **Setup > Accounting > Accounting Preferences > Time & Expenses > SHOW WARNING MESSAGE FOR TAXABLE EXPENSE LINES WITHOUT RECEIPT**.
